## Work experience

### ZasmLabs PVT LTD

**Mar 2023 – Apr 2023**

React Developer

1. During my internship tenure, I successfully managed the company's project on an Avalanche Detector App. I took the initiative to implement UI enhancements in the app using React and Redux.
2. The Avalanche Detector App was a project undertaken by DRDO (Defence Research & Development Organisation).
3. Additionally, I studied the Beaglebone Black device and established a connection between it and Windows using an SSH client called Putty.
4. Furthermore, I acquired knowledge about the Adafruit GPS module, including its layout structure. I successfully connected the Adafruit GPS module to the Beaglebone Black, enabling me to retrieve GPS signals using a Minicom network.

---

## Summary

I am a Passionate & Enthusiastic Web Developer . I Have Designed Websites Using React Framework while managing state through Redux saving users time . I Have also developed an integrated database using MongoDB . I have a proven track record of providing reliable and efficient service. I am able to create strong PHP/LAMP/MySQL applications, with proficiency in core JavaScript, jQuery and HTML5 .
